**SUPPLEMENTARY INFORMATION:** We, the U.S. Fish and Wildlife Service (Service), are announcing the availability of the following documents for review and comment by the public and Federal, Tribal, State, and local governments:

- Candidate Conservation Agreement with Assurances for Arctic Grayling in the Centennial Valley, Montana (Centennial Valley CCAA), and
- Draft Environment Assessment of the Centennial Valley CCAA (EA).

The Service, Montana Fish, Wildlife and Parks (MFWP), and local partners prepared the Centennial Valley CCAA to give non-Federal landowners the opportunity to voluntarily conserve Arctic grayling (a fish species) and its habitat in the Centennial Valley, Montana. Participating landowners would implement certain conservation measures to reduce or eliminate threats to the Arctic grayling on their property related to ranching activities and associated water uses. In return, the Service would give participating landowners regulatory assurances that it will not impose land or water use restrictions or conservation requirements beyond those in the CCAA, if the Arctic grayling becomes listed under the Endangered Species Act (ESA). MFWP is applying for an enhancement of survival permit under the ESA, to enroll landowners in the Centennial Valley CCAA with certificates of inclusion. To comply with the National Environmental Policy Act (NEPA), we prepared a draft EA that analyzes potential impacts to the human environment from the proposed Centennial Valley CCAA and a no-action alternative.

We determined that the Upper Missouri River Distinct Population Segment of the Arctic grayling was not warranted for listing under the ESA, and announced that finding in the **Federal Register** on August 20, 2014 (79 FR 49384). However, Federal and State resource agencies, nongovernmental conservation organizations, and private landowners are continuing conservation efforts for the Arctic grayling in Montana. Although the Arctic grayling is not currently a candidate species, our regulations at 50 CFR 17.22(d)(1) and
